
Staff Vacancy: Content Editor

One objective of Students for the Exploration and Development of Space (SEDS) Canada is to provide resources for students and young professionals to stay updated on current events and opportunities in Canada's space industry. Given that the ideal way to do this is through online content, we are seeking someone to maintain our website and other SEDS Canada media content.

The Content Editor will be responsible for managing the SEDS Canada website, as well as the Space Opportunities Resource Board (SpaceORB). Additionally, the individual will edit and write website articles to keep the public updated on SEDS-related activities and space news.

While knowledge of HTML, JavaScript, and web development are assets, the Content Editor should be passionate about space and modern technology, and able to work remotely with little supervision.

Primary duties:

- Manage website content
- Keep SpaceORB and news resources up-to-date
- Edit and write articles for the website
- Basic knowledge of HTML
- Proficiency in English
- Knowledge of JavaScript and web development are an asset

Requirements:

- Time: 4-5 hours/week
- Background in computer science preferred
- Self-motivated & independent

While programming experience is an asset, the most important fulfillment is a willingness to learn in a fast-paced and professional environment. This is an unpaid volunteer position. Apply today by sending your resume, cover letter, and any other relevant materials to work@seds.ca by January 31st, and we'll get back to you to set up an interview if you are selected.
